PROFESSIONAL SUMMARY

IT support specialist and systems developer with a B.S. in Computer Science and experience across user support, endpoints, identity, Microsoft 365, and hybrid Windows environments. Builds internal applications and PowerShell automations that replace manual processes, improve data quality, and make IT work more repeatable. Combines hands-on support, full-stack development, documentation, and security-minded implementation.

TECHNICAL SKILLS

IT Operations: Windows, macOS, Linux, Microsoft 365, endpoint provisioning, troubleshooting, patching, VPN support, mobile device support, technical documentation

Identity & Administration: Active Directory, Microsoft Entra ID, Group Policy, Exchange, SSO/OAuth, permissions, user lifecycle workflows

Automation & Internal Tools: PowerShell, Power Apps, Power Automate, SharePoint Lists, JSON, Pester, Zendesk, IIS

Development & Data: Python, JavaScript, TypeScript, C#, SQL, React, Node.js, ASP.NET Core, Flask, MongoDB, SQLite, REST APIs

Infrastructure & Delivery: Git, GitHub, Docker, Google Cloud Run, Azure, AWS, monitoring, backups, self-hosting

PROFESSIONAL EXPERIENCE

IT Support Specialist

June 2024 – Present

Streimer

Portland, Oregon

- Provide Tier 1 and Tier 2 support across Windows and mobile endpoints, Microsoft 365, VPN connectivity, user access, hardware, software, and operational technology.
- Administer user accounts, permissions, endpoints, and policy-driven access across Active Directory, Microsoft Entra ID, Exchange, Group Policy, and device-management tooling.
- Design PowerShell automations for workstation provisioning, employee lifecycle workflows, endpoint inventory, patching, backup, validation, and repeatable troubleshooting with logging and safe defaults.
- Independently built and deployed a Power Apps, SharePoint Lists, and Power Automate inventory system that reduced typical material lookup time from approximately 25–30 minutes to 5–10 minutes.
- Developed SafetyCheck, a mobile-first React application that replaced paper equipment inspections with validated, searchable, auditable records and barcode-assisted asset lookup.
- Built an IIS-hosted ASP.NET Core intranet portal for QR-based SOP lookup, mobile PDF viewing, and structured employee acknowledgements; documented deployment, maintenance, and tablet support.

Client-Sponsored Project

January 2023 – June 2023

iGrafx / Portland State University Capstone

Remote

- Collaborated on a six-person team to build a React, Node.js, Express, and MongoDB release dashboard integrating Jira, GitLab, and SonarQube data.
- Designed and implemented the company-wide project list page and user-specific project list page for project and deployment data.
- Contributed unit testing and project documentation to improve reliability, maintainability, and team handoff.

SELECTED TECHNICAL PROJECTS

Homelab Workshop

January 2026 – Present

Maintain a private environment for containerized services, storage, backups, monitoring, secure remote access, automation, troubleshooting, and recovery documentation. Practice infrastructure as a lifecycle spanning implementation, validation, maintenance, and restoration.

Riot Games Leaderboard - Google Cloud Run

September 2022 – December 2022

Independently built a Flask application that transforms live Riot Games API data into Valorant and League of Legends leaderboards; tested with Pytest, packaged with Docker, and deployed through Google Cloud Build and Cloud Run.

EDUCATION & PROFESSIONAL DEVELOPMENT

Bachelor of Science in Computer Science, Minor in Business Administration

June 2023

Portland State University

Portland, Oregon

Portland State University - Web Development Program

September 2022

Verified credentials: Program Completion | JavaScript & APIs | HTML, CSS, & Bootstrap
